ÁNGEL SARRIÓN

SENIOR BUSINESS ANALYST LEAD & IT SPECIALIST

angelsarrion@gmail.com · Albacete / Madrid, Spain · UK Experience (Milton Keynes)
LinkedIn · GitHub · Portfolio

EXECUTIVE PROFILE & SCOPE

Technology leader with over 18 years architecting and delivering mission-critical IT solutions and business process engineering in enterprise banking. Specialist in credit risk decisioning engines, automated underwriting, and large-scale system integration across Santander UK and Europe. Proven track record aligning executive business vision with robust engineering execution under zero-downtime, strictly regulated environments.

STRATEGIC INITIATIVES (FEATURED)

Risk Decision Service (RDS)

Santander UK · 2021 – 2025

Role: Tech Lead & Senior IT Specialist

Core real-time credit decisioning engine powering Santander UK retail and commercial lending evaluations under strict regulatory compliance and ultra-low latency SLAs.

- Led the end-to-end architectural redesign of systems involved in Credit Risk checks, significantly increasing scoring accuracy, throughput, and auditability.
- Orchestrated BAU agile releases and defect resolution, ensuring continuous enhancements and zero disruption to daily lending operations.

Stack: Credit Risk Engines, REST APIs, Agile / Scrum, Jira & Confluence, DevOps, Change Authority, Dynatrace, Data Modelir

Project Spectrum

Santander UK · 2018

Role: Lead Business & System Analyst

Flagship strategic initiative within the Santander DIGITAL programme: end-to-end automated digital onboarding and credit card issuance for commercial & business banking customers.

- Architected functional and low-level technical designs connecting digital customer onboarding journeys directly to back-office risk scoring pipelines.
- Integrated IBM API Gateway (DataPower/Connect) for high-throughput, secure enterprise API orchestration.

Stack: IBM API Gateway, Near Real-Time Data Lake, CI/CD, PaaS, DevOps, Business Banking, Onboarding Automation

Risk PCSM Project

Santander UK · 2016 – 2017

Role: Lead System Analyst

Complete redesign of the entire Retail Credit Risk architecture at Santander UK to meet modern banking market demands, multi-product eligibility, and automated underwriting.

- Directed technical analysis and delivery of automated risk assessment workstreams covering Credit Cards, Personal Accounts, and Business Banking.
- Refactored legacy admission systems into modular service architectures, reducing loan evaluation turnaround times from days to seconds.

Stack: Retail Credit Risk, Admission Systems, Agile Delivery, Jira & Confluence, Solution Architecture, Automated Underwrit

PROFESSIONAL CAREER HISTORY

Santander Digital Services — Jan 2026 – Present
Coordination Lead – Team Lead BAU (Risk Decision Services) · Boadilla del Monte, Madrid / Albacete, Spain

- Lead and coordinate a multidisciplinary team of 20+ professionals, overseeing end-to-end SDLC execution to ensure operational continuity and system support across all BAU workstreams.
- Accountable for platform stability and critical incident response across a complex ecosystem of 250+ software components.

Santander Digital Services — Jun 2025 – Dec 2025
Senior Business Analyst Lead · Boadilla del Monte, Madrid / Albacete, Spain

- Define and refine Jira user stories with rigorous acceptance criteria, aligning engineering delivery directly with business goals and compliance mandates.
- Coordinate cross-squad developer activity, resolving technical queries and maintaining high delivery cadence across the full lifecycle.

Santander UK — Jan 2021 – May 2025
Senior Information Technology Specialist (RDS Tech Lead) · Milton Keynes, United Kingdom

- Technical leadership and architectural redesign of the Risk Decision Service (RDS) governing real-time Credit Risk evaluations at Santander UK.
- Orchestrated BAU agile releases, defect triage, and continuous performance tuning, ensuring zero disruption to critical lending services.

Santander UK — Apr 2012 – Dec 2020
System Analyst / System Business Analyst · Milton Keynes, United Kingdom

- Pivotal role in the Credit Risk IT Business Unit, mastering Admission systems and progressing to Lead Analyst for major bank transformations.
- Spearheaded key workstreams within the Santander DIGITAL programme, including Project Spectrum (2018) for business banking credit card onboarding.

Isban UK — Apr 2011 – Apr 2012
Functional Analyst · Milton Keynes, United Kingdom

- Delivered functional analysis and system integration for the Armadillo Project: Santander Life Insurance Sales application in partnership with AVIVA UK.
- Responsible for implementation, testing, and 2nd/3rd line support across J2EE, .NET, Biztalk, and COBOL backend services.

Vector ITC Group — Sep 2007 – Feb 2011
Software Developer · Albacete, Spain

- Java EE Developer responsible for analysis, design, and implementation of retail banking components for Crèdit Andorrà and Santander corporate web apps.
- Engineered backend modules for Red.es, managing registration, hosting, and governance infrastructure for Spanish Government .es domains.
