ÁNGEL SARRIÓN

SENIOR BUSINESS ANALYST LEAD & IT SPECIALIST

Albacete / Madrid, Spain · Milton Keynes, UK Experience • angelsarrion@gmail.com • linkedin.com/in/angelsarrion • github.com/angelsarrion

EXECUTIVE PROFILE & SCOPE

Proven, passionate, and experienced technology specialist in the IT sector with over 18 years driving complex software solutions and business process re-engineering. Skilled in enterprise architectures, credit risk admission and decisioning engines, and translating high-level business goals into scalable, resilient implementations. Politically astute with the proven ability to navigate high-stakes environments, liaise between executive stakeholders and multidisciplinary engineering teams, and maintain zero-downtime operational excellence.

TOP STRATEGIC INITIATIVES (FEATURED)

Risk Decision Service (RDS) (TOP 1)

Santander UK · 2021 – 2025

Role: Tech Lead & Senior IT Specialist

Mission-critical real-time credit decisioning engine for Santander UK. Redesigned and maintained the core systems powering all retail and commercial lending evaluations with strict regulatory compliance and ultra-low latency.

- Led the comprehensive end-to-end redesign of systems involved in Credit Risk checks across Santander UK, dramatically increasing assessment accuracy, throughput, and auditability.
- Coordinated BAU (Business-As-Usual) sprint releases, incident mitigation, and automated deployments adhering to strict Agile and Change Authority governance.

Stack: Credit Risk Engines, REST APIs, Agile / Scrum, Jira & Confluence, DevOps, Change Authority, Dynatrace, Data Modeling

Risk PCSM Project (TOP 2)

Santander UK · 2016 – 2017

Role: Lead System Analyst

Complete overhaul of the entire Retail Credit Risk landscape at Santander UK to meet modern banking directives, multi-product eligibility, and automated underwriting.

- Directed technical analysis and delivery of automated Credit Risk assessment workstreams covering Credit Cards, Personal Accounts, and Commercial Banking.
- Modernized legacy admission workflows into modular service architectures, drastically shortening loan approval turnaround times from days to seconds.

Stack: Retail Credit Risk, Admission Systems, Agile Delivery, Jira & Confluence, Solution Architecture, Automated Underwriting

Project Spectrum (TOP 3)

Santander UK · 2018

Role: Lead Business & System Analyst

Flagship strategic initiative within the Santander DIGITAL transformation programme: end-to-end automated onboarding and credit card issuance for commercial & business banking customers.

- Architected functional and low-level specifications connecting client-facing digital journeys directly to back-office scoring pipelines.
- Pioneered integration with IBM API Gateway (DataPower/Connect) for secure, high-volume enterprise API orchestration.

Stack: IBM API Gateway, Near Real-Time Data Lake, CI/CD, PaaS, DevOps, Business Banking, Onboarding Automation

PROFESSIONAL CAREER HISTORY

Santander Digital Services
Jun 2024 – Present

Senior Business Analyst Lead · Boadilla del Monte, Madrid / Albacete, Spain

- Define and refine Jira user stories with precise acceptance criteria, ensuring technical delivery aligns rigorously with business objectives and compliance.
- Coordinate and track end-to-end development sprint activities, unblocking dependencies and technical queries across diverse engineering squads.
- Empower QA teams by defining testing scopes, boundary conditions, and expected outcomes for automated and exploratory validation.

Stack: Jira & Confluence, Agile / Scrum, DevOps, Change Authority, Technical Architecture, Enterprise Integration, QA Automation

Santander UK
